*Now ply your Harvest! with the Ant be wise,  
That no man may hereafter you Despise.  
For Nature still at this time hath a care.  
To fill your Garners for the future year.*

## An Astrologo-Physicial Discourse.

**T**hat the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects, and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust me then to these Rules Astrological, to be observed for the advantage for the sick;

Let the	{	Sanguine	{ bleed the	D	{	♄, or ♀.
		Cholerick				♅, or ♄.
		Phlegmatick				♆, or ♀.
		Melancholly				♁, ♀, or ♄.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ♄ is in ♅; with Pills, when she is in ♄; with Portions, when in ♄, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the Stomach, it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ♄ is in ♄, ♀, or ♆ in any good Aspect of ♀, ♄, or ☉.

Glysters are most conveniently administred, when the ♄ is in ♄, ♀, or ♀, posited as before.

Good to stop Fluxes, or Rheumes. or Issues, when the ♄ is in any of the Earthly Signs, viz. ♄, ♀, or ♄; of which experience is a valuable witness.

Very proper to Bath, when the ♄ is in ♅, ♀, ♀, or ♄, in Aspect of ♀, or ♄.

Convenient to cut Hair, the ♄ being in ♀, ♆, ♀, or ♄, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

# Sundry Excellent Astrological Rules to be Observed in Agriculture, Husbandry, &c. according to *Claudius Darius*, and other Learned Astrologers, Physicians, and Philosophers.

**I**t is not unknown (but by daily Experience demonstrated) to those of Cain's Profession, (viz. Tillers of the Ground) that all Plants, Seeds, and other things, which are produced out of the Bowels of the Earth, (having her for their common Parent, as it were) do receive both Increase and Decrease by the motion, and position of the Moon, and therefore it is, that the careful Husbandman in Sowing Seeds, planting Trees, grafting Scions, pruning Vines, gathering Fruit, felling Timber, dunging Land, and in all other necessary Appendixes to Agriculture, that he may the better reap the Fruits of his Labour and Toyl, should be acquainted with the Influences of the Moon and Stars, as the Noble Virgil approves of in his Georgicks. And that his expectations may be the better answered, he ought in the first place to have a special regard to the state and condition of Saturn that he be not impeded or afflicted in the beginning of any Rural affairs, for that he is the Ruler of Husbandry, and hath Dominion over all Terrene Commodities. Let him therefore (if you can so order it) be in good aspect of Jupiter or Venus well affected, not Peregrine, Retrograde, or Combust, but rather in some of his own Dignities, in good Configuration of the Moon, free from the Beams of Mars, who, in this Case ought to be weak, Cadent, Peregrine, Combust, void of all Dignities well Essential as Accidental.

Let all manner of Grain or Corn be sowed when the Moon increases, in Signs movable, as Aries, Cancer, Libra, Capricorn, or, if she chance to be in Taurus, Virgo, Sagittarius, Pisces, let her be in Sextile or Trine of Saturn; if your Land be moist, or the Seed of a moist nature that is sowed, then let the Moon be decreasing in Virgo, Capricorn or Aries, — If your Ground be dry and the Seed of a like condition, let the Moon be increasing in Cancer or Pisces, in good aspect to Saturn, who, together with the Moon should be in good configuration of Jupiter or Venus, — but if your Land will

## TRIGGE, 1691.

Is to be Sown be of a middle Constitution or Condition, viz. between dry and moist, it is then good to Sow it, when the Moon is in Libra, well befriended.

What you intend to Plant, let the Moon be in Conjunction, Sextile or Trine of Saturn, free from the Body or ill Beams of Mars in a fixed Sign, as Taurus, Leo, Scorpio, or Aquarius, and let her be in some aspect of Jupiter or Venus, if possible.

In planting Trees or Vines, let the Ascendant be Fixed, and the Moon placed in an Earthy Sign, as Taurus, Virgo or Capricorn, in good aspect of Saturn.

Graft or prune Trees the Moon decreasing in Aquarius chiefly and in aspect of Jupiter or Venus.

Fell Timber for Architecture from November the 22, to January 22. the Moon decreasing in Taurus, Virgo or Capricorn, and let her be in good aspect of Saturn.

Plash Hedges, fell Wood for Fuel, that the Stocks may the better grow again, the Moon increasing in Aries or Libra, chiefly in the first quarter, Jupiter or Venus assisting.

Cut Vines in December, January or February the Moon in Aries, Taurus, or Libra. --- Remove Trees when she is in the same Signs, all the last quarter in November, December, or February, and dung Land, to prevent Weeds, in the last quarter.

Good to till Gardens, to Sow and set Plants and Herbs; to let Hop-poles and make a Hop-yard, the Moon in Libra or Aquarius,

Gather Apples, and other Fruits, Herbs and Flowers, to have them large and fair, the Moon increasing toward the Full: to keep and preserve them in store gather them dry, the Moon decreasing, in aspect of Jupiter or Venus.

Shear Sheep, cut Grass for Hay, the Moon increasing, so it will Spring again the sooner.

Kill Fat Swine near the Full, the Fat will endure boyling the better, and waste less then if kill'd at other times.

Geld Cattle, knit Lambs, the Moon decreasing free from the beams of Saturn or Mars, and in some aspect of Jupiter or Venus,

Set Beans or Pease in the New Moon, and they will ever be blooming, and so run all up into Stalks: This is affirmed by that excellent Philosopher, Sir Ch. Heydon, in his admirable Discourse of Astrology.

Of the ECLIPSES which will Happen of the Sun and Moon  
this Year, 1691.

**A** According to the doctrine of Astronomy, (Keplers Epit, &c.) there will happen two Eclipses of the Sun, but not any of the Moon in this Year. The Eclipses of the Sun are as following,

The first Solar *Deliquium* happens on Febr. 18. about our Five of the Clock, morning, and is celebrated in the first Decanate of *Pisces*. It will be a great Eclipse, but not conspicuous to us, the Luminaries being *sub Terra*; The first face of *Pisces*, according to *Johannes Angelus*, is govern'd by Saturn, and signifies Anxiety in humane affairs, many cogitations, and journeys, odd kinds of removing from one place to another, and denotes men industrious to acquire Riches and Fame. The Embleme he presents this Decanate by, is, --- A Man carrying a Burden on his Back and Travelling. The effects therefore are unpleasant, for Saturn is naturally an Enemy to humane kind. They should fall chiefly upon those things under the Watery Triangle, or such as inhabit Islands. or are concerned in maritime matters, destruction of Fish, and water-Fowl, Piracies, Shipwracks, Nau-macies, and heavy burdens upon stubborn and treacherous people. I might enlarge but for two Reasons. 1. *Origanus* says, Eclipses hurt not, (*nil nocet*) when they are invisible, though *Leoviti* and others affirm the contrary, but I cannot now reconcile their repugnancies. 2 My Limits are too narrow to discourse at large of these matters.

The second Solar Eclipse will happen on Aug. 13. near Six at night, and will be celebrated in the beginning of the *Celestial Virgin*, and will be visible not only in England, but in most part of Europe, if the Air be serene, (of which there is some fears and will appear a great Eclipse, (if we may credit *Argol* and others) for that near three parts of the Suns Body will then be obscured. The envious Planet Saturn rules the Horoscope at the time of this Solar Defect, and is posited in the 9th Angle, in a prolar opposition of Jupiter. But Mercury rules the place of the Eclipse, and the fiery planet Mars from Gemini casts an angry gaze both at him and the Eclipsed Sun. *Præclus* says, an Eclipse of the Sun in the first face of *Virgo*. *Calamitosum regis alicujus exitum, & stragem arguit*. The Judgement will speak English

## TRIGGE 1691.

*English* to several places far South or Southwest from *England*. And also in some parts or Countreys near the *Equinox*, for *Virgo* is an Equinoctial as well as a Northern humane Sign.

*Johannes Angelus* says, the first Decadate of the *Virgin* is Govern'd by the Sun, and hath an Influence upon Rural affairs, as plowing, sowing the Fields, the planting Herbs, Trees, Peopling Towns, whence people should gather Riches, and by their Labour obtain Food and Necessaries. The Emblem is, *A Man laying up money in a Chest*. *Virgo* is indeed an Earthy, Covetous and laborious Sign, And it will be some more then common happiness to hear of *Peopling Towns*, and of the success of *Village* &c, much more then to be terrified with the amazing noise of *Burning, Plundering, Destroying Towns or Villages*. We hope the destroying Angel hath almost Ended his Commission, and is nearly sheathing his destroying Sword. That he may wholly do it, Let all true *Christians* joyn in Prayer, That God would spare us, and not be Angry with us for ever.

Of the Four Seasons of the Year, their Nature and Description, &c.

### I. Of the SPRING.

**T**He Spring-Quarter, the most pleasant and delightful Season in the whole Year, begins always when the Sun, (that Glorious Lamp of Heaven, that Type of God, the visible Deity, the Eye and Soul of the Visible World) Enters into the Equinoctial Sign Aries, thereby Renewing his Course to us, and Reviving the Souls of Men, Minerals, Plants, Vegetables, &c. then making the Days and Nights equal. And to us on this side of the Equator, he increases the quantity of Sun-shine, and decreases our proportion of Shadow; Or, which is all One, begins then to make the Days longer, and the Nights shorter unto us.

This Salubrious Season begins this Year in our  
Horizon

# TRIGGE 1691.

Horizon upon *March* the 10th. day in the Morning, and presents us with the following Face of Heav. viz.

The time of this Vernal Ingress. I have obtained from the Accurate Tables A. *Astronomia Anglicana*, lately limited into the World, by Ingenious Mr. Nicholas Greenwood of Sandwich in Kent. And it nearly Accords with all the

best Astronomical Tables extant, viz. *Keplers, Billins, Bullialdus, Wright, Wing, Newton, &c.* — Albeit I question not, but that some Almanack-Makers that love to be singular, and delight to oppose manifest Verity, will wilfully neglect all those Authors that Harmoniously consent to Celestial Observations, and boastingly chuse to follow the *Caroline Tables*, the widest from Truth of any, as differing from all the rest in the Sns place commonly 4 or 5 minutes, sometimes 7 or 8 minutes, which produceth a vast difference in the Face of Heaven, every minute in the Sns place answering to 24 minutes in time; so that whereas here is the beginning of *Taurus* in the Horoscope, by those *Novel Tables* we shall have the latter part of *Gemini* or beginning of *Cancer* to Ascend in our Horizon. But the Falsity of the *Caroline Tables* hath been affirmed in print above xx years since, by J.H. (or some other for him) in the

## TRIGGE 1691.

*Holy Guide, prope finem.* And also by *Vin. Wing* in his *Examen Astr. Carol.* both which were never answered by the Author in his life-time, and remains yet so, ever since his decease. Some Men are naturally in love with fallhood, so that 'tis but to add folly to misery to complain. Let every man therefore follow his own conceit, and Ride his own Hobby-horse and welcom, I am not displeas'd. But since they cannot be content to do so without recriminating upon others, and wounding the Truth; and yet suffer the weighty Objections taken to their *Dianota* remain unanswered. I shall be bold to tell the Sober *Astronomer*, such behaviour is at least shameful, if not impudent. I forbear Naming any man, as being guided by that known *Law* of Civility, (which themselves would do well to bear in mind) which enjoyns us, — *Parcere personis, dicere de vitiis* — Only let me Require them, that if they find the year agreeable to Saturn in the 7th, and Venus in Mars, and the Moon in the 8th. Angle the Sun, Jupiter and Mercury in the 12th, they would be so modest for their own sakes, and so ingenious for the sake of Verity, as to alter their Minds, and to concur with those several *Authors* that so happily agree (nearly) with each other. I might be larger herein, and would also Interpret the Figure to you, but my Room is too narrow to allow of it here.

### II. of the Summer Quarter.

The Summer Quarter always Commenceth where the Spring ends, viz. when the Sun having passed the three first Signes of the Zodiack, *Aries, Taurus, Gemini*, toucheth the first Scruple of the Tropical Sign *Cancer*, at which time (being then at his greatest distance from the Earth) he maketh longest days and shortest Nights to all that inhabit these Northern parts of the World. And this most comfortable and refreshing Season begins this year in the Meridian of *London*, upon the 11th. day of *June*, between the houres of 3 and 4 in the morning.

The temper of this Season is hot and dry naturally, and assimilated to Choler. Now the Phlegmatick persons are most vigorous and healthy, and the cholerick most subject to Distempers, Elderly Men are likewise active and lively, and Youth or young Folks, by reason of the Excess of Blood and Spirit, are aptest to Intemperance, and so exposed to Diseases,

cases, as Pleurifies, Corruption of Blood, Consumptions, &c. Burning Agues, Imposthumes, Dizziness, pains in the Head, Frenzies, and the like, It was the Saying of the learned Cardan, -- Morbosodimus, sed accersimus.

### III. Of the Autumnal Quarter:

The Autumnal or Harvest-quarter begins where the Summer ends, viz. when the Sun having Finished his perambulation through the second three Signes of the Zodiac, Cancer, Leo, Virgo; then entering the first scruple of Libra, the Autumnal Equinox, there making Days and Nights equal all the World over, under the Poles excepted, as he did at the beginning of the Spring. At this time the Nights begin to exceed the days in length, and all things sensitive and vegetive begin to lose their strength and glory, and hasten to a decay according to the Decree of Nature. This Season Commenceth this Year on September 12, about one in the Morning, in the Meridian of London. The quality of this quarter is cold and dry, and Compared to Melancholy amongst the Humours. Young persons are now most Active and in Health, and those of Phlegmatick Constitutions, Elderly Melancholy Men, the contrary, The Diseases that commonly Reign (with us) in this quarter, are Meigrivis, Epilepsies, Faundice, Oppilations of the Spleen, Difficulty of Breathing, Convulsions, Boyles, Gouts, Dropsies and sundry others, which call for the Physicians Care to correct.

### IV. Of the Winter Season,

The Brumal or Winter-quarter ever initiates where the Autumn ends, viz. when the Sun having Transited the three Harvest Signes of Libra, Scorpio, Sagittary, doth Enter the first Minute of the Southern Tropicke Capricorn; At which time having Finished his greatest Southern Declination, he begins to approach us again, that inhabit these Northern parts. The Diurnal Arch of the Sun, (or his stay above the Earth) is now but small, and his Nocturnal Arch very great, making the shortest Days and longest Nights to us: The Heat or Solar Warmth is now at the lowest, and Cold begins its Regency, and Tyrannizeth all this Season to purpose. And it initiates this Year with us in London, upon December 12. between One and two of the Clock in the Morning.

The quality and Temperature of this Season, of its own Disposition, is generall, Cold and Moist, quite opposite unto that of the Summer.

The

# TRIGGE 1691.

The Youthful and Cholerick People are best in Health. but it proves very unkind and unwelcome to the Aged and Pblegmarick. The Diseases which Accompany this Quarter are Coughs, Catarrhs, Straticies, Rheums, Gouts, Melantholy, Sore Eyes, Scorbute, Spleen, Epilepsies, and all other Diseases which proceed from Corruption and Rottenness of Humours, together with divers kinds of Sicknesses incident to the Female Sex; From every Malady, Libera nos Domine.

It may not unfitly be Remembred, That on July 25, this Year, there will be Celebrated a famous Opposition of Saturn and Mars (the two Malignant Planets, as Astrologers commonly term them) One of them is with the Pluades, and the other in opposition to that turbulent Constellation. The Effects whereof will be seen, not only in the Air, but in the Actions and Passions of Humane kind I mean; that part of them only, that are subject to those two Signes wherein the Opposition is made. And thus I End my this Years Calendar Astrologicum. F I N I S.
